## Gi Plast

### The company

Founded in 1986 by brothers Enrico and Danilo Ghidi, Gi Plast srl has become a leader in the field of extrusion. The three buildings owned by the company, with a total volume of 10,000 m<sup>2</sup>, house eighteen extrusion lines, ten coextrusion systems, and a rich set of machines and tools, as well as large stocks of raw materials. Highly qualified personnel and constant investments in the most innovative technologies translate into top quality products and timely deliveries. Well known on the national market, Gi Plast is now experiencing a significant growth in Europe and the rest of the world. Its products are exported to many countries, in and outside the EU, and the company's constantly growing turnover can be seen as a good sign for the future.

Gi Plast's wide product line-up includes sections, tubes, diffusers, shields, gaskets, panels, that are used in the most diversified fields, including the lighting sector and the building industry, decorative uses and the contract sector.

An example of the versatility of Gi Plast products is provided by Silky, a range of pipes entirely made of 100% acrylic material, just perfect for the decorative sector. An ideal tool for architects and designers wishing to produce imaginative creations playing with light and colours. The standard range of colours includes: white for the interior, yellow, red, blue, green, purple, orange, amber and white for the exterior. Like the other products by Gi Plast, the Silky range can meet the customisation needs of the most demanding customers.
